

## CONSERVATORY AWNING

The small type conservatory awning with inconspicuous cassette made of extruded aluminium and powder coated. When retracted, the awning cover is protected from adverse conditions by the fully encompassing cassette. The awning cover is guided along lateral strong stainless steel rods.

All components require minimal maintenance and are protected against corrosion.

### Design and technology

The small inconspicuous cassette made of extruded aluminium is powder-coated, and when retracted the awning cover is guided along lateral strong aluminium guide tracks. A special tensioning system using a combined elastic and kevlar belt provides ideal cover tension when the awning is fully extended.

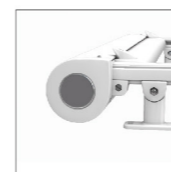

## Features

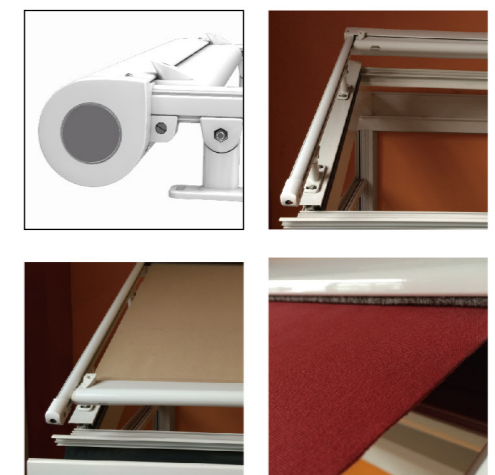

- Full cassette round/square shape design to protect the fabric from color fading and dust.
- Brush seal to protect the fabric and keep it clean.
- Safety lock block

### High-quality brilliance

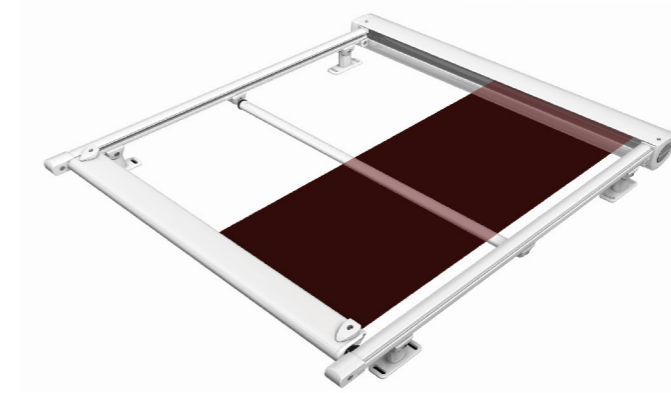

RAL9016 ( white )
