

Aluminum Venetian Blinds

These finer-look venetian blinds are reliable, highly functional and decorative window treatments - fully adjustable to get the desired light ambience in a room.

- Harsh sunlight and heat excluded during the day, while indoor warmth retained at night
- Smart appearance that adds finesse to a room

Keep that fresh colour and pristine condition in your furnishings

With finely spaced slats, these blinds efficiently reflect harsh sunlight, yet allow a good light level in your room - keeping your furniture and floor coverings in that original fresh condition.

Precise control of light and temperature giving you power savings

Slats can be opened to let the cool breeze through, or closed a bit to reduce cooling bills by reflecting the sun's heat. An unrestricted view is possible by pulling blinds right up. At night, fully tilting slats can block light and create total privacy - conserving heat in your room.

Easy to operate - with a special safety system

Our Aluminium venetian window blinds are smooth and easy to draw up and down. There is a clear plastic wand to open and close slats (for 25mm size) or a cord (for 50mm size), plus cords to raise and lower the blind. The blinds have a crash-proof cordlock (with steel self-locking to hold their position) for easy operation and improved safety.

Long-lasting resilience – Clever design and cost-efficient manufacturing

All Aluminium blind slats are stove-enamelled and will retain their original colour and brightness for many years. New improved components and processes help streamline production and cut costs. A new tape roll support and internal tape lock button speeds up assembly.

Specifications

Size

- Minimum width:
 - Tilt only: 25cm
 - Split controls: 30cm
 - Combined control: 40cm
- Maximum recommended width: 250cm
- Maximum recommended area: 7.5m²

Components

- Slat width: 25mm - 50mm
- Slat thickness: 0.18mm (for normal 25mm) – 0.21mm (for perforated 25mm) – 0.21mm (for 50mm)
- Head rail: 25 x 25mm & 19 x 27mm (for 25mm) – 57 x 51mm (for 50mm)
- Bottom rail: 20 x 10.4mm (for 25mm) 'C' shape cross-section – 49 x 20.5mm 'H' shape (for 50mm)
- Cords optionally on left or right as required
- Ladder: String or wide fabric tape (for 50mm) - string (for 25mm)
- Slats are high tensile aluminium for extra strength and crease resistance, stove enamelled to retain original colour and brightness throughout many years
- Head rails and bottom rails are powder coated steel to increase strength and blind life span

Installation

- Easy to lift and angle, installed in minutes with easy-to-follow instructions and mounting components supplied

Operation

- Wand (for 25mm) or cord (for 50mm) on left for tilting / cords on right for lifting, or vice versa, or both on the same side
- Tilttable slats - from clear unrestricted view to total view blocking
- Crash-proof cordlock
- Wire control (tilt-only mechanism, for 25mm) is also available for double glazing, composed of a metal wire covered with a plastic tube, a round knob for control and a copper connector

Cleaning

- Clean Aluminium venetian window blinds by closing slats and using feather duster, soft brush or cloth.
You can also use a vacuum cleaner on low setting
- Clean stains with a damp cloth, or gently spray-clean and allow to dry thoroughly
- A special hand cleaning brush is also available in our stock (for 25mm blinds)

Colour range

We have many neutral colours in addition to printed (wood look) and perforated slats to suit a wide range of décor. The headbox, bottom rails, tapes, and cords are all colour co-ordinated with the slats.
